Education

B.Sc. Computer Science • August 2022 - August 2026
Jomo Kenyatta University of Agriculture and Technology (JKUAT) - Juja, Kenya
Kenya Certificate of Secondary Education (KCSE) • 2018 - 2022
Nakuru Boys High School - Nakuru, Kenya

Experience

Vaunt

Full-Stack & DevOps Engineer • May 2026 - Present | *Vaunt E-Commerce Platform*

- Built and deployed a multi-tenant e-commerce platform and admin dashboard using **Next.js**, **Mantine UI** and **ElysiaJS**.
- Managed database schemas, migrations, and query execution using **Drizzle ORM** and **Bun**, backed by **TypeBox** validation.
- Integrated **Stripe** payment workflows and **Better Auth** to process secure digital transactions and user authentication.
- Configured container deployment pipelines, environment isolation and proxy routing using **Docker** and **Caddy**.

Hailerz

Full-Stack & DevOps Engineer • May 2026 - Present | *Hailerz Community Platform*

- Built a community and marketplace platform featuring creator tools, challenges, learning academies, and talent hiring hubs.
- Integrated **Paystack** payment channels and configured user authentication using **Better Auth** and **Drizzle ORM**.
- Set up frontend table filters, URL search params, and state synchronization using **TanStack Table**, **TanStack Query** and **nuqs**.
- Enforced code quality standards using **Biome** and **Lefthook git hooks** across a **Bun**, **Next.js**, **Elysia**, **Docker**, and **Caddy** stack.

JKUAT

Software Developer • Jun 2026 - Aug 2026 | *JKUAT Website MVP*

- Redesigned and improved web interfaces using **Next.js**, **shadcn/ui**, and **TanStack Table**.

- Connected client components to an **ElysiaJS** backend using **Eden RPC** for type-safe API communication.
- Handled server state management, caching, and form input validation using **TanStack Query** and **TypeBox**.

Xapxap

Mobile Developer • May 2026 - Present

- Built features for a cross-platform social media mobile app using **React Native** and **React Native Reusables**.
- Configured local offline data sync and relational data layers using **Drizzle ORM** and **Supabase** backend services.
- Improved user navigation and feed rendering performance across mobile screens.

LastMile

Full-Stack Engineer • Jul 2026 - Jul 2026 | LastMile Platform

- Built a cashless, borderless cross-border transfer platform backed by the **Stellar Blockchain network**.
- Integrated **Africa's Talking USSD APIs** with an **Express** backend to enable transaction flows for feature phone users.
- Designed the frontend dashboard interface using **Next.js** and **shadcn/ui**.

Semantrix

Full-Stack Developer • Mar 2026 - Present | Semantrix Platform

- Built a browser extension using **WXT** and **Express** to fix web accessibility issues for screen reader users.
- Integrated LangChain and local data storage with **Drizzle ORM** to automatically parse and improve dynamic web page elements.

Baykart
Mobile Developer • Oct 2025 - Dec 2025 | Baykart App on Google Play

- Refactored the **React Native** app to make the code easier to read, maintain, and run faster.
- Set up **TanStack Query** and **Axios** to handle API requests, manage caching, and cut down unnecessary network calls.
- Built and improved core features to make the Android app smoother and easier to use.

Web Developer • Oct 2025 - Dec 2025 | Admin Panel

- Refactored the admin dashboard using **TanStack Router** and **Mantine UI** to improve code quality, rendering speed, and internal workflows.

- Built key user administration tools, managing server state and API data fetching with **TanStack Query** and **Axios**.
- Worked with cross-functional teams to keep design systems and functionality consistent across web and mobile platforms.

CodeYetu
Web Developer • May 2025 - Present | *Code Yetu Hackathon Platform*

- Built and maintained the platform for Code Yetu hackathons using **Next.js** and **Mantine UI** for the frontend, with an **Express** backend.
- Set up database migrations, queries, and schema relationships using **Knex** and **PostgreSQL**.
- Handled end-to-end integration between the frontend interface and backend APIs to support project submissions and user registration.

Web Development Trainer • Oct 2025 - Present

- Designed and delivered beginner-friendly lessons covering **HTML**, **CSS**, **JavaScript** and basic frontend concepts
- Guided students through practical projects to build confidence and problem-solving skills in programming
- Encouraged creativity, teamwork and consistent learning habits among young aspiring developers

Rastuc Technologies Limited
Lead Mobile Developer • May 2025 - Sep 2025 | *Rastuc Patient App on Google Play*

- Built, styled, and deployed the cross-platform mobile app using **React Native**, **NativeWind**, and **React Native Paper**.
- Integrated **Apollo Client** with **GraphQL** APIs to handle mobile state, data fetching, and real-time backend updates.
- Managed builds, key store signing, and published updates directly to the Google Play Store.
- Mentored junior developers, ran team syncs, assigned tasks, and tracked release milestones.

Frontend Developer • Jul 2024 - Sep 2025 | *Rastuc Web Platform*

- Built responsive web interfaces using **Next.js**, styled with **Mantine UI** and **shadcn/ui**.
- Connected web components to backend services using **Apollo Client** and **GraphQL** queries and mutations.
- Worked with design and product teams to translate layouts into clean, accessible React components.

Backend Developer • Jun 2024 - Nov 2024

- Maintained and built new endpoints for **Django** APIs using **Strawberry GraphQL**.
- Wrote unit tests and updated API documentation to improve codebase reliability and team onboarding.
